Education

Bachelor Of Engineering (Computer Science), *Sant Longowal Institute Of Engineering and Technology*
08/2020 – 06/2024 | Sangrur, Punjab
8.9 CGPA

Professional Experience

Intern, *Entangle Software Private Limited* 🔗

10/2022 – 04/2023

Position: FullStack Web Developer

Responsibilities and Achievements:

- Developed the frontend of web applications using Angular, leveraging Angular Material for UI components, and employed SCSS for efficient styling.
- Utilized MongoDB Atlas as the Cloud Database to store and manage data.
- Implemented the backend using Golang, ensuring robust and efficient server-side operations.
- Employed Docker and Kubernetes for containerization and orchestration, enhancing scalability and reliability.
- Designed the architecture following Microservice principles, leading to improved maintainability and scalability.
- Deployed frontend and backend as separate microservices, enhancing modularity and scalability.
- Utilized Angular Http Service to manage REST API communication with the Go backend, ensuring seamless data flow.
- Contributed to various mini projects, including enhancing and adding features to the company website.
- Created a Django server for a mini project, expanding technical skills and capabilities.
- Collaborated on a client project to enhance responsiveness and user experience on web pages.
- Managed version control using Git with platforms like Github and Gitlab to facilitate team collaboration and code tracking.

Technical Content Writer and Reviewer,

Geeks For Geeks 🔗

04/2022 – present

- Written 82 technical articles on web development, DevOps, data structures, and algorithms.
- Improved 100+ existing technical articles.
- Reviewed Devops technical articles for GeeksForGeeks.
- **GFG Articles** 🔗
